ReName-It File Renaming Tool

Rname-it 3.1.1.d Description

"The most powerful, yet simple and portable, BATCH renaming utility ever built..."

The main purpose is to allow the user to batch (en masse) rename a large quantity of files with only a few clicks. User can select single or multiple files and rename them all at once. Files can easily be organized and grouped by renaming to a new common prefix and/or padded with a unique numerical or alphabetical value, ideal for sequential sorting purposes. Also features Real TimePreview and Full Preview to ease the user in a complicated renaming procedures. Great for graphics collectors and webmasters! This update includes individual or mass modification to file's attribute, date, and time. File list box are now vertically resizable for larger view under higher you can free download Rname-it 3.1.1.d now.

DB PowerAmp

This program converts among all audio formats with the most possible settings. It's indispensable for the encoding and decoding of music files with ID3v2 tag editing, and it now has LAME support. It converts to and from WAV, PCM, MPEG, MPEG-1, MPEG-2, MP3, WMA, ALF2, ADPCM, GSM, G.726, DSP, A-LAW, ACM, U-LAW, Ogg Vorbis, and CDA files (audio CD tracks) with optional settings (from 8,000Hz to 48,000Hz, and up to 192Kbps). It records audio from microphones and cassette tapes. Advanced encode/decode tools contains only hi-fi compression algorithms, a unique AC3 decoder, support for WMA, Ogg Vorbis, and MP3 formats, an easy-to-use interface, and an ID tag editor. Batch mode converts more than one file at the same time, and ID tags are preserved during conversion. Version 6.0.0.2 adds unspecified features and skins.

CoffeeCup Free Zip Wizard

CoffeeCup Free Zip Wizard makes it easy to Zip and Unzip files. It has built-in E-mail and FTP functions, so you can Zip and send your files in one easy step. Free Zip Wizard can also run any program or setup file inside Zip files. It can also create self-extracting .exe files, and find all the Zip files on your system too.

CoffeeCup Free Zip Wizard follows you through the process of opening, creating, modifying, or finding a .zip file. Create a self-extracting .zip file, labeled actually as a .exe file, to make distribution a breeze. This method will allow the person receiving your file to simply double-click and open the file to get the files you archived.

Free Download Manager

Free Download Manager Features

GNU General Public License

Free Download Manager is released under GNU Public License!

BitTorrent support

Download files using BitTorrent protocol (available in Windows 2000/XP/2003/Vista).

Upload manager: easy way to share your files

Upload your files or folders easily to share them with other users.

Flash video download

Download video from video sites, such as Youtube, Google Video, etc. The video can then be saved in native .flv format or converted to one of more popular video formats.

Remote Control

Create new downloads or view the list of active and completed downloads remotely, via the internet.

Portable mode

If you want to use Free Download Manager on different computers, you can easily create its portable version and avoid the need to install and configure the program on each computer.

Enhanced audio/video files support

Preview audio/video files before download is completed and convert file format after download.

Absolutely free and 100% safe

Free Download Manager is free, open-source software distributed under GPL license.

Download acceleration

Free Download Manager splits files into several sections and downloads them simultaneously, allowing you to use any type of connection at the maximum available speed. With FDM download speed increases, or even more!

Resuming broken downloads

When the downloading process is interrupted, you needn't start from the beginning again. Free Download Manager can resume broken download from where it was interrupted saving your time, nerves and money.

Smart file management and powerful scheduler

With FDM you can easily organize downloaded files by their type, placing them in predefined folders. A smart scheduler allows you to start and pause downloading files, as well as perform other actions (launch other applications, establish or hang up connection, etc.) at the set time.

Adjusting traffic usage

There are several traffic usage modes. You can adjust traffic usage for browsing the Internet and downloading files at the same time.

Site Explorer

Site Explorer lets you view the folders structure of a web site and easily download necessary files or folders.

HTML Spider

You can download whole web pages or even whole web sites with HTML Spider. The tool can be adjusted to download files with specified extensions only.

Simultaneous downloading from several mirrors

Free Download Manager is able to download files from several mirrors simultaneously.

Zip files partial download

Free Download Manager lets you download only the necessary part of a zip file.

Active spyware and adware protection through active communication among users

You can read what other community members say about the file you are going to download, right in the program window, and also leave your own opinion about the file you downloaded. In this way FDM users are always warned against useless or malicious files.

Multi language support

Free Download Manager is translated into 30 languages. Supported languages are: Macedonian, Serbian, Albanian, Croatian, Korean, Arabic, Brazilian Portuguese, Bulgarian, Chinese Traditional, Chinese, Czech, German, Dutch, French, Hebrew, Hungarian, Italian, Polish, Portuguese-Brazil, Romanian, Russian, Slovak, Spanish, Swedish, Turkish, Uzbek, Greek, Vietnamese, Slovenian
